2005 LEGISLATIVE CHANGES

Legislative changes affecting the forms covered by this document are summarized below. Additional information can be obtained from the legislative information system at <http://leg1.state.va.us> or from the Legislative Summary at www.tax.virginia.gov.

Standard Deduction: Beginning in 2005 the standard deduction for married individuals filing jointly increases from \$5,000 to \$6,000 (\$3,000 for married filing separately).

Personal Exemptions: The personal exemption amounts for filers, spouses and dependents have been increased to \$900 per exemption effective for taxable year 2005. The change does not affect the amounts for exemptions claimed for age (over 65) and blindness, which remain at \$800 per exemption.

Filing Threshold: For 2005, the filing threshold increases from \$5,000 to \$7,000 for individuals filing as single or married filing separately and from \$8,000 to \$14,000 for married couples filing jointly.

Extensions: Taxpayers are granted an automatic six-month extension for filing an income tax return. No application for extension is required; however, any tax due must be paid with a special voucher, Form 760IP, by the original due date for filing the return (May 1, 2006 for calendar year filers). The penalty for underpayment of tax has increased to 2% per month.

Voluntary Contributions: See Appendix F for the list of eligible organizations.

Fixed Date Conformity: See the website at www.tax.virginia.gov for any 2006 General Assembly updates.

Enterprise Zone Grant Program: The existing system for enterprise zone tax credits is being replaced with the Enterprise Zone Grant Program. On July 1, 2005, the Enterprise Zone Act expired, but all enterprise zones that were in effect prior to July 1, 2005 will continue until the end of their 20-year designation period. In addition, the Enterprise Zone Business Tax Credit and the Enterprise Zone Real Property Investment Tax Credit will still be allowed for those businesses that already receive the credits or have signed agreements with the Commonwealth to do so.

Neighborhood Assistance Act Tax Credit: Increases the maximum Neighborhood Assistance credit that individuals may receive in a taxable year from \$750 to \$50,000.

Penalty for Preparers of Fraudulent Tax Returns: Creates a class 6 felony for income tax return preparers who knowingly and willfully aid, assist in, counsel, or advise the preparation or presentation of a fraudulent tax return, affidavit, claim or other document required by the income tax laws that the preparer knows is fraudulent or false as to any material matter. The Tax Commissioner is authorized to initiate injunctive action to stop the fraudulent preparer from engaging in return preparer fraud or, in certain circumstances, from acting as an income tax return preparer.

INTRODUCTION

PURPOSE AND BACKGROUND

This document is designed to provide tax preparation software developers (“vendors”) with requirements for the computer-generated tax year 2005 Virginia Individual Income Tax forms and accompanying schedules. Included are:

- Print and programming design specifications for the 2005 760CG return package
- Two dimensional barcode record specifications for the 2005 760CG return package
- Approval requirements for forms, including test case specifications
- Contact information

The 760 CG return package includes the following forms:

- Form 760CG
- Schedule ADJ/CG
- Schedule OSC/CG
- Schedule FED
- Schedule CR/CG
- Schedule INC

Note: The Schedule INC contains information from and is used to replace taxpayers’ W-2s. The Schedule INC is required when submitting Forms 760CG. When filing Forms 760PY and 763 a Schedule INC may be filed in lieu of the W-2s.

2D Barcode

The 2D barcode location is the top right of page 1 of the Form 760CG. The barcode is limited by the boundaries of columns 44 and 80 and by rows 4 and 13. If your software does not support 2D barcodes, the reserved space must be left blank.

Important: If vendor is using 2D barcode software, 2D default must be on.

1D Barcode

The placement of the 1D barcode is not the same for each form. See each form for the location of the associated barcode. Appendix B provides the 1D barcode scheme and other technical data.

FORMS APPROVAL REQUIREMENTS

The approval process for the 760CG return package and for coupon-sized returns and vouchers includes processing the test case returns submitted for approval through our automated systems. To ensure that your 760CG return package and coupon-sized documents can be approved quickly when received at TAX, always submit original returns and schedules. See the voucher specifications document for voucher approval requirements.

760CG Series: Please note that all 760CG return package software developers, regardless of whether they purchase an approved TAX form from a third party vendor, are required to submit test case samples for approval. The samples must incorporate data that has been predefined in this document. Exact positioning of all data elements is required for approval. Vendors also providing 2 dimensional barcodes on 2005 760CG returns must meet 2 dimensional barcode requirements listed in this document.

All other full size forms: The text and layout of forms that do not have exact positioning or OCR requirements should reproduce the official form as presented on the agency's web site, www.tax.virginia.gov.

Submission Requirements

- 760CG Series: Four originals of the Form 760CG and all associated schedules must be provided. One set should be fully filled (full field). Three sets should contain information listed in Appendix J. All forms submitted for testing must be originals. Photocopies, fax submissions, etc. will not be accepted.
- Other full size forms: Two complete sets of all other forms are required for testing.

Approval does not mean that forms or software are error-free. Approval means that the vendor has demonstrated that the forms meet requirements listed in this document. Vendors must submit substitute forms to the department for review before distribution or release to customers and clients.

GENERAL GUIDELINES FOR SUBSTITUTE FORMS

PAPER AND INK REQUIREMENTS

- Paper size: 8.5 inches x 11 inches.
- Printing: single sided.
- Orientation: portrait.
- Paper weight: 20 pound bond (non-recycled) paper.
- Paper color: white.
- Ink: black. Colored inks and light printing may result in processing problems that delay return processing.

Paper and ink specifications, that cannot be controlled directly by vendors are critical to the successful processing of returns, and should be communicated to your customers.

MARGINS AND LAYOUT

Print Area

The page size for full-page forms must be 8 ½ x 11 inches. Using the 6 lines per inch requirement and half-inch margins, the first available print line is line 4. The last print line is line 63. Using 10 characters per inch for the horizontal measurement, the first available print column is column 6. Column 80 is the last available print column. Grid locations are provided in Appendix A. The locations are in column, line order.

Lines

Lines should be printed on forms only as specified in this document. Please review each form to determine where lines should be placed. For the 760CG return package, there are no lines on any of the forms except on the Form 760CG return at the bottom of page 1 and the bottom of page 2. All unnecessary lines were removed to improve automated character recognition processes. For forms other than coupons, vouchers, and the Form 760CG return package, forms must appear in the same format as the official versions of the forms.

For Office Use Only Areas

There are various areas on most all TAX forms that are reserved “For office use” only. The Vendor is required to include the text and, if required, lines to separate and designate these areas as “For Office Use”.

TAX SOFTWARE DEVELOPER INFORMATION

Vendor Codes

The NACTP code is a 4-digit field. TAX allows 5 digits for the software developer’s code, 4 digits for the NACTP code plus 1 digit to distinguish among companies or software versions. For example, if you release both a DOS and Windows version of your software, the 5th position may include a D or W. If you do not have an NACTP code, a Virginia code will be assigned to you during the approval process.

On the Form 760CG return, page 1, there are two fields following the label “Vendor ID”. The first field is for the developer’s NACTP code. The second field is four characters and is for the print form vendor’s NACTP code.

Examples for the 760CG

Vendor 9999 developed both the software and the printed form	Software developed by vendor 9999 Printed form purchased from vendor 9990
Approved Vendor: 9999 (left justified)	Approved Vendor: 9999 9990

Logos, State Seals, and Control Numbers

No company logos, state logos, or state seals should be placed on forms. Version numbers, company names, and text abbreviations may be placed on the margins of forms provided the information does not interfere with data capture. This determination will be made on a case-by-case basis during the approval process.

Generally, marginal data does not interfere with data capture if it is placed in the lower left corner of the form and it is at least 1 print position (both horizontally and vertically) from variable data.

FONT REQUIREMENTS

Text Fields

- The minimum point size is 6 point.
- The maximum point size is 12 point.

Controlled Data Fields

Font for controlled data fields must be 12 point 10 pitch Courier.

Special Characters

Special characters should not be used in any controlled data field on TAX forms, unless specified by TAX. Special characters include:

\$	*	%	#	[]	{	}	()
----	---	---	---	---	---	---	---	---	---

1D Barcode Font

- The format of the 1D barcode is 3 of 9.
- The height of the barcode is 1/2 inch.
- A 2:5:1 wide narrow bar ratio should be used.

2D Barcode Font

- The format for the 2D barcode is PDF 417.
- The 2D barcode must be printed using 300 dpi.
- 2D default must be “ON”

Important: Decimals must not be included in the barcode.

NAME AND ADDRESS DATA FIELDS

Vendors should print the name and address fields using Courier 12 as follows:

Name 1 Fields	
Size	Name
12	First Name
1	Space
1	Middle Initial
1	Space
15	Last Name
1	Space
3	Suffix
34	Total

Name 2 Fields	
Size	Name
12	First Name
1	Space
1	Middle Initial
1	Space
15	Last Name
1	Space
3	Suffix
34	Total

NUMBERS AND DATES

Numeric Data Field Format

- All numeric amount data fields must be right justified.
- Decimal points must always be printed.
- Commas must never be included in a dollar value.
- Dollar signs must never be included in a dollar value.

Example: Numeric amount \$14,538.16 must be printed as 14538.

Required: 14538. Always include a decimal point.

NOT ACCEPTABLE	14,538.16	1453816	} DO NOT use commas or dollar signs.
	14538	14,538	
	\$14538.16	\$14538.	
	\$14538.16	\$14,538.16	
	\$14,538		

Failure to comply with these requirements will cause returns to misread and reject as errors during processing, resulting in delays in issuing refund checks.

Rounding to Nearest Dollar

TAX requires rounding to the nearest dollar on all individual income tax forms reproduced by vendors. Rounding improves the speed and accuracy of the data capture process. Vendors should not drop pennies without rounding to the nearest whole dollar. Each field should be rounded to the nearest dollar and any calculated fields should be the sum of the rounded dollar amounts. For example, the amount 1.52 should be printed as 2.

Specifically, rounding is required on:

760CG	763
Schedule ADJ/CG	770
Schedule OSC/CG	Schedule NPY
Schedule FED	760PMT
Schedule CR	760E/CG
Schedule INC/CG	760ES (Direct)
760PY	760ES (Local)

Rounding is allowed but not required on all other returns and vouchers. It is recommended that software allow users the option of rounding or printing cents on the forms for which rounding is optional.

Negative Numbers

Negative numbers must be indicated by a hyphen “-“ prior to the first digit in the variable data field. Do not use parentheses as negative indicators.

Allowed	-15264.	Always use a hyphen in the space next to the first digit of the negative number
Not acceptable	(156264.) or -15264.	Never use parenthesis and never include spaces between the negative number and the hyphen.

Date Fields

Date fields must be created using two digits for the month, day, and year (MMDDYY).
